

Rolling Plan for Bolivarian Republic of Venezuela

As of April 1st, 2016

Basic Policy	Promotion of environment
--------------	--------------------------

Priority Area 1	Environmental protection and disaster prevention
--------------------	--

Development Issues Environmental protection and disaster prevention and reconstruction assistance, etc	<p>[Current Situation and Issues] Venezuela has abundant oil resources, the development of high-speed road network, has become a society that depends on the car because it was aimed at the expansion of commuting focus on the development of the surrounding cities. A large amount of cars flows to urban areas, air pollution caused by permanent traffic jam, have become a social problem lead to a delay from the sanitary environmental degradation of the waste disposal aid water supply and sewerage development in the surrounding region in which it has been a turbulent development. Also, has become a landslide at the time of torrential rain caused by climate change, disruption of transportation networks, destruction of roads, also flooding like at the time of contamination and flooding of rivers due to illegal dumping problem. Based on these circumstances, Environment and Ministry of Water Resources, the spread of environmental education and eco-society in mind, it has focused on environmental protection and conservation. In addition, naturally centered on the Cabinet Office Disaster Management Deputy Minister of disaster, has focused on the spread of disaster prevention education for the general public to strengthen anti-earthquake measures. Environmental education in order to realize the efforts of such government, waste disposal, the cooperation of human resource development of the Disaster Prevention and Reconstruction has been a need in Japan.</p>		<p>[Policy on Development Issues] Disaster prevention in the Community and management of the environment (waste management, global warming, etc) through training on specific issues, as well as improved training, sending volunteers to local human resources in environmental management, and is extended to the general public through educational practices and conservation activities of the natural environment.</p>

Development subject Improvement of basic human needs (BHN) to contribute to the alleviation of poverty and regional and social disparities	<p>[Current Situation and Issues] Decline of crude oil prices, since 2014, giving a fatal blow to the government revenue in 2015, inflation from the shortage of foreign currency, goods shortage, resulted in a severe impact on people's lives leading to a deterioration of security. The government is trying to the achieve a generous policy for the poor layer, but has not been able to resolve the complaints of people without growth in domestic production. In order to deal with these challenges, it is necessary to improve the capacity building of relevant ministries and agencies, transportation, information and communication technology, natural resources and energy, regional development, health care, professional and occupational training in the social sector areas such as education. There is a need to support the development of highly conscious human resources.</p>		<p>[Policy on Development Issues] Provide issue-specific training program in accordance with the needs of each area, to promote the capacity building of relevant ministries and agencies by increasing professionalism. In addition, to implement assistance for the healthy growth of young people responsible for the next generation through dispatch of volunteers.</p>
